

Python Data Science Machine Learning - Internship For BTech/B.E

Contents

Chapter1: Data Science overview

- **Data Analysis**
- **Data Scientist**
- **Real World Use Cases of Data Science**

Chapter2: Data analytics overview

- **Overview of Data Analytics**
- **Business Problems**
- **Data Analytics Processes**

Chapter3: statistical analysis And business applications

- **Introduction**
- **Tools Used for Statistical Analysis**
- **Sample Vs Population**

Chapter4: Python Environment Setup and Essentials

- **Installing Anaconda**
- **Advantages of Anaconda**
- **Jupyter Notebook**
- **Running Hello World Sample**

Chapter 5: python for data Science – Getting Started

- **Introduction**
- **Variables And Data Types**
- **Data Structures**
- **Tuple, List, Dictionary, Set**
- **Basic Operations on Data Structures**
- **Functions**
- **Control Flow**

Chapter 6: Mathematical Computation With Python (numPy)

- **Introduction to Numpy**
- **Advantages of Using NumPy**
- **NDArrays**

Chapter 7: Data Manipulation With Pandas

- **Introduction To Pandas**
- **Advantages of Pandas Library**
- **Features Of Pandas Library**
- **Pandas Series**
- **Pandas Data Frames**
- **Handling Missing Values**

Chapter 8: Machine learning

- **Introduction about Machine Learning**
- **Terminology**
- **Understanding Datasets**
- **How Supervised Learning Model work**
- **How Unsupervised Model works**

Chapter-9: Scikit - Learn

- **Introduction About Scikit Learn**
- **Problem Solution Approaches**
- **Machine Learning Model Implementation**
- **Supervised - Linear Regression Model**
- **Supervised - K-Nearest Neighbor**
- **Unsupervised - K-Means Cluster**
- **Model Persistence**
- **Model Evaluation**

Chapter-10: Data Visualization

- **Introduction To Data Visualization**
- **Data Visualization Considerations**
- **Data Visualization Tools in Python**

Chapter 11: Data pre processing

- **What is Data Pre processing**
- **Feature Engineering**
- **Data Normalization**
- **Data Standardization**

Projects

1. Natural Language Processing - Spam and Ham Message Classification

2. Disease Prediction Using Logistic Regression
